PROFESSIONAL SUMMARY

Senior Software Engineer with **6+ years** of experience building and modernizing **enterprise-scale customer-facing platforms** using **React, Next.js, TypeScript, Node.js, GraphQL, and Google Cloud**. Specialized in **platform modernization, performance engineering, secure software delivery, and cloud optimization**, delivering measurable outcomes including **60% cloud infrastructure cost reduction, 85% faster application performance**.

SELECTED IMPACT

- Reduced cloud media-hosting costs by 60% through Cloudinary archival pipelines, lifecycle policies, and optimized media delivery.
- Reduced production media storage by approximately 72% (180 GB → 50 GB) across three production microservices.
- Improved application performance by up to 85% by standardizing three Ember.js frontend microservices into Next.js.
- Designed enterprise headless CMS architecture using Next.js, WPGraphQL, GraphQL, and JSON-LD.
- Strengthened Secure SDLC using Docker, Jenkins CI/CD, SonarQube, Snyk, and enterprise penetration testing.
- Supported customer-facing auto-commerce platforms serving 100K–300K monthly visitors.

CORE TECHNOLOGIES

Frontend: React • Next.js • TypeScript • JavaScript • Redux • Tailwind CSS

Backend: Node.js • Express.js • Go • GraphQL • REST APIs

Databases: PostgreSQL • MySQL • MongoDB • Redis

Cloud & DevOps: Google Cloud Platform • Docker • Jenkins • GitHub Actions • CI/CD

Engineering Quality: Jest • Cypress • SonarQube • Snyk • Kibana

PROFESSIONAL EXPERIENCE

Software Engineer | PT Adira Dinamika Multifinance Tbk (IDX: ADMF) | Aug 2022 – Present

- Modernized customer-facing digital platforms by leading the migration of three production Ember.js frontend microservices ([momotor.id](#), [momobil.id](#), and [moservice.id](#)) into a unified Next.js architecture, improving application performance by up to 85% while reducing technical debt, SEO compliance, and increasing maintainability.
- Redesigned media storage architecture across production services through Cloudinary archival pipelines, lifecycle policies, scheduled migrations, image optimization, and media delivery enhancements, reducing production media storage from 180 GB to 50 GB and lowering cloud media-hosting costs by 60%.
- Eliminated dependency on a standalone WordPress frontend by designing a headless CMS architecture using Next.js, WPGraphQL, GraphQL, and JSON-LD, enabling editorial teams to continue publishing through WordPress while serving SEO-optimized content directly within enterprise applications.

- Strengthened Secure SDLC by integrating Docker, Jenkins CI/CD, SonarQube, and Snyk into deployment pipelines for multiple production microservices while satisfying enterprise security standards and external penetration testing requirements.

Software Developer | Binar Academy | Apr 2020 – Aug 2022

- Designed and implemented JWT-secured REST APIs with reusable backend modules, optimized SQL queries, filtering, and pagination.
- Built production-ready React applications and CMS functionality within Agile delivery teams.
- Improved engineering quality through code reviews, debugging, automated testing, and technical documentation.

INDEPENDENT PRODUCT

Alpha Stream | Market Intelligence Web3 Platform

- Designed and developed a production-ready market intelligence platform using reusable React architecture and real-time dashboards.
- Built scalable frontend architecture for high-density financial data visualization with responsive layouts and efficient state management.

[Tiny Bitty](#) | E-commerce platform for a premium FMCG.

- A fast product experience with guided catalog browsing, bundle configuration, analytics, and a handoff into WhatsApp ordering.
- Reduces discovery and checkout friction while preserving the high-touch ordering workflow required for custom and corporate orders.

CERTIFICATIONS

- [Google Cloud Certified: Associate Cloud Engineer](#)
- Binar Academy: Full-Stack Web Application | 2020

EDUCATION

- Bachelor of Business Administration — STEKPI (Universitas Trilogi) | 2007 - 2011

PREVIOUS EXPERIENCE

Operations Management — PT Bank Sinarmas Tbk (2011–2020): Led operational process improvement, stakeholder coordination, regulatory compliance, and risk management before transitioning into software engineering.
